Metaplex account reference

Metaplex finalization guide

Method: one finalized RPC snapshot; decoded with the official Metaplex Genesis SDK 0.43.0. The escrow balance equals the LP mint supply, and the escrow authority matches the Genesis program-derived address.

Scope of this proof

This documents the named pool at the checked slot. It is an escrow-lock record, not a burn receipt or a full smart-contract audit. It does not guarantee token safety or price and does not cover other pools or future deposits.

Record ID: SDEX-LP-449081823

`Evidence JSON SHA-256: 39ca3471335204893e71c53982b8b4f2acfbc3c32c8e14cfd10068a4c7e78bc1`

The JSON companion contains the RPC response, decoded fields, checks and transaction record.
